PB1 - Climate Change

Sustainability 2013, 5, 2305-2326

Australia’s urban built environment contributes significantly to the nation’s greenhouse gas emissions; therefore, encouraging urban development to pursue low-carbon outcomes will aid in reducing carbon in the overall economy. Cities and...

PB2 - Ocean Acidification

Effects of Temperature and Ocean Acidification on the Extracellular Matrix of Marine Calcifiers | Volume 01 | Issue 02 | October 2022

Increasing anthropogenic carbon dioxide is predicted to cause declines in ocean pH and calcium carbonate saturation state over the coming centuries, making it potentially harder for marine calcifiers to build their shells and skeletons. One.
